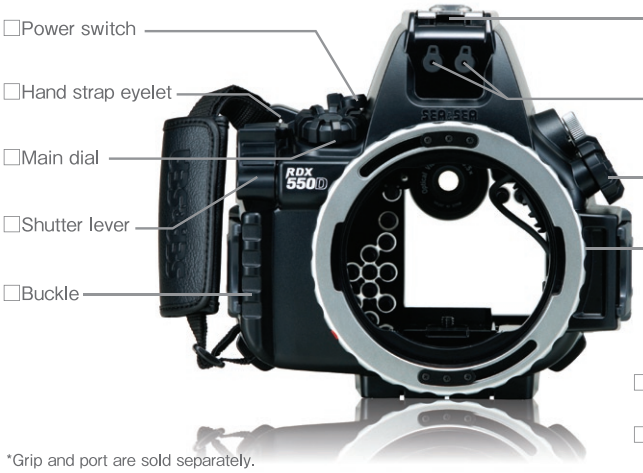
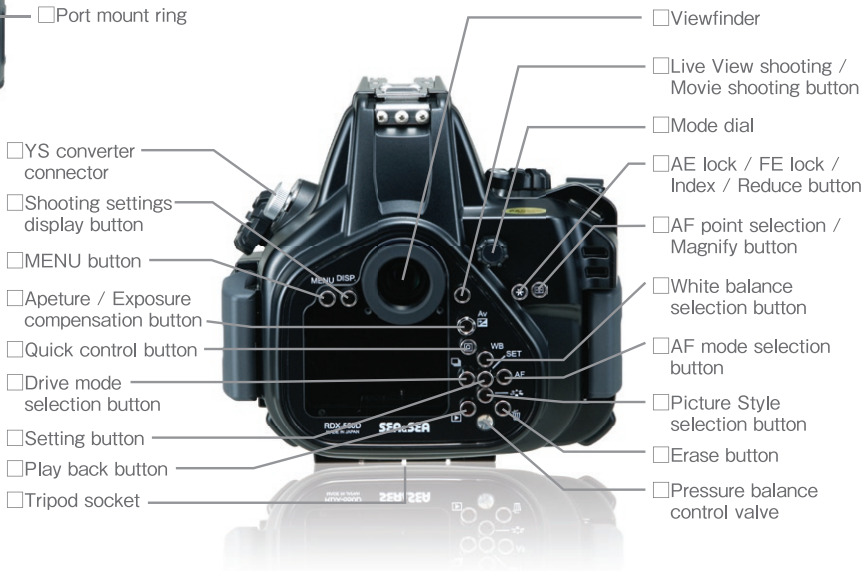
High image quality with approx. 18 million pixels allows you to take Full HD video.

SEA&SEA THE UNDERWATER IMAGING COMPANY



*Grip and port are sold separately.

Construction	Polycarbonate
Depth rating	60m / 200ft
Dimensions (WxHxD)	200x190x139.5mm / 8x7.6x5.6inch
Weight	Approx. 2,000g / 70oz (Housing only)



U/W Housing for Canon EOS REBEL T2i / T1i / EOS 550D / 500D

RDX-550D

■RDX-550D Housing (Black) (Housing only) Product No. 06153

■RDX-550D Housing and Standard Port Set Product No. 06630

Easy mounting

Camera Quick Shoe for easy mounting and removal of the camera. Mounting the camera becomes a breeze. You need only to slide the camera quick shoe into the slot, up to the designated position. There is almost no need for complicated position and gear alignments so even beginners can easily mount a camera.

Two Fiber-optic cable sockets

Simply by connecting the Fiber-optic cable (L-type) to the connector, the light of the digital camera's built-in flash is detected and connected to an external strobe. This is considerably less complicated than setting up an electrical connector that requires detailed knowledge. It also eliminates any risks involved when the connector is submerged in water.

TTL auto adjustment available when using an optional YS Converter/C. When using a YS Converter/C to enable the TTL auto adjustment, use a Sync Cord/N to connect it to a genuine SEA&SEA strobe.

Features a 0.5x pick-up viewfinder that makes it easy to see the whole field of view. An optional exchangeable viewfinder can be selected as well.

New lineup of ports includes the RDX Standard Port (for most standard zoom lenses), the RDX Port Base L (for joint use with NX-series ports) and the RDX Port Base S (for joint use with compact macro ports). Using the appropriate port base, you can use any type of existing NX ports, expanding the range of lenses that can be used.

A new type of easily operated shutter lever, excellent for taking quick snapshots. The shutter lever can be operated in two ways—by pushing from the top or pulling from the front—and offers an option for adjusting the autofocus by pressing the button halfway down so you need not worry about any missed chances.

*The housing becomes compatible with EOS REBEL T1i and EOS 500D by replacing the button rubber (accessory).

Accessories

Grip-Stay L

Product No. 22108

Grip and base stay with adjustable horizontal width and angle. The SA8 or a New Housing Lanyard can be attached to the grip.

YS Converter/C

Product No. 50118

This converter can be used to attach an external strobe to Canon digital SLR camera housings and allows for TTL adjustment.

Fiber-Optic Cable (L-type)

Product No. 50107

This fiber-optic cable resists bending and has improved light-conducting efficiency.

5-pin Sync Cord/N

Product No. 17100
