

12-Megapixel Compact Underwater Digital Camera System.

DX-2G Camera Housing

DX-2G

Product No 06604

SPECIAL OFFER

DX-2G Camera

From super macro to wide-angle photography

Features a macro mode for close-up photography, allowing you to get as close as 1cm / 0.4inch to the subject at the wide-angle end or 4cm / 1.6inch at telephoto end. Even with a standard lens, you can achieve an angle of view of 24mm at the wide-angle end.

SEA&SEA mode best suited for underwater photography

A still image mode for optimal underwater photography. The color balance is ideally set so anyone can easily take pictures of deep blues.

[Features]

- 1/1.7-inch CCD with approximately 12.1 effective megapixels
- Large, high resolution 2.7-inch LCD monitor with 460,000 pixels
- 24-72mm 3.0x optical lens that demonstrates excellent optical qualities
- A newly-developed image engine and enlarged buffer memory allows you to take up to 5 continuous shots in RAW mode. The recording speed has improved to 3 seconds
- Up to three individual settings of the My Setting function allow you to customize recording settings to your preference
- Equipped with electronic level
- Strong and durable build, with a depth rating of up to 55m / 180ft
