

Equipped with a high-performance HID lamp that has a max. brightness of 1,750 lumens.

U/W Video Light

LX-24HID

■ LX-24HID (Black) Product No. 09106

Can be used for a variety of applications including as a video camera, digital camera, and diving light.

With use of a highly efficient, high-performance HID (metal halide) lamp, it can provide approx. three times (75 W) as much light, even compared to halogen lamps with the same output. With a color temperature of 6500 K, which approaches that for sunlight during midday, this lamp can be said to be the perfect light for underwater shooting.

LED power indicator on the main body shows how much battery power is remaining (green: FULL, amber, red: Low).

When used as a video light, mount the light to the Sea Arm VII using the accessory adapter for camera arm.
When used as a dive light, fix the Hand Grip to the light.

Powered using a rechargeable Li-ion battery with less memory effect.

Max. of 120 minutes of continuous lighting with a fully charged battery.

With 3 light filters for different lighting purposes: "Diffusion," to widen the beam angle and to change from sport to flood; "Yellow," for better visibility when foggy; and "Amber," to bring the color temperature down to 5600 K.

With a multi-volt type of charger that supports 100 V to 240 V. Can be used for charging overseas as is.

Features an overpressure relief valve for safety. Equipped with an explosion-proof valve as a fail-safe measure to protect against rupture, etc. due to internal chemical reaction dynamics or differences in pressure between internal and external.

* Can be used out of water (for a max. of 60 min.).

Product Specifications

Bulb type	24W HID
Light output	1750 Lm
Beam angle	36° (90° with diffusing filter)
Run time	Approx. 120 minutes
Battery	Rechargeable lithium-ion battery
Color temperature	6,500K (at max. light intensity)
Charging time	Approx. 6 hours using the exclusive charger
Battery charger	Input voltage AC 100V - 240V
Depth rating	120m / 400ft
Dimensions (DIA×D)	75x250mm / 3.0x10inch (not including projections)
Weight	Approx. 1,550g / 54.3oz (underwater: Approx. 700g / 24.5oz)
Construction	Body: corrosion-resistant aluminum alloy
